***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-16, drawn to graphical user interface, classified in class 345, subclass 700.
- II. Claims 17-32, 40, drawn to data structure, classified in class 707, subclass 100.
- III. Claims 33, 34, drawn to data ranking, classified in class 707, subclass 7.
- IV. Claims 35-39, drawn to query processing, classified in class 707, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as graphical user interface, invention II has separate utility such as data structure, invention III has separate utility such as data ranking, invention IV has separate utility such as query processing. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2171

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
